Attorney Docket No.: 8733.824.00-US

**ABSTRACT OF THE DISCLOSURE** 

A liquid crystal display device includes a first substrate having a plurality of pixel regions, a

plurality of gate and data lines on the first substrate, a thin film transistor at a crossing portion

of the gate and data lines, a first auxiliary electrode under the data line, a plurality of second

auxiliary electrodes in a horizontal direction of the pixel region, a pixel electrode in the pixel

region, a plurality of protrusions on a second substrate, the protrusions being formed between

the second auxiliary electrodes, and a liquid crystal layer between the first and second

substrates.
